

Assignment Monday September 15<sup>th</sup> Blended Physics

**We are going to be changing the way some of our learning is done starting Tuesday. I am going to go over more concept stuff in class on Tuesday and Thursday from now on. Also, I am going to be creating my own notes to give as powerpoints and not use the books powerpoints. I think you will get more out of my slides than the books. Also, I am going to make all the qui and test questions now. The book is going to become a reference for you. I will put all the necessary information in my slides. You will no longer need to get notes from both places.**

**The class will become more concept based and less math based like the last test. We will talk in class on Tuesday.**

**One last thing. I am absent today. For all of you that need to come in we will start that on Wednesday.**

A) Take notes over Friction Ch 5.4 in your text we will be skipping Ch 5.3. You will need to define all vocabulary for CH 5.4 and write down **all** other important information. The vocabulary is also listed at the end of each chapter or is highlighted in blue while you read through the textbook. You have options on how to take your notes.

1. Read the textbook and take notes.
2. Listen to the voice over of the textbook and take notes.
3. Listen and watch my presentation and take notes.

I would read and take notes and then watch my presentation to get other information.

B) Take the quizzes at the end of CH 5.4 Take the quiz as many times as you like and upload your grade to Moodle by 11:00 pm **tonight**.

No other work. Just the notes and quiz.
