

Assignment Wednesday October 29th Blended Physics

A) Take notes over Centripetal Force parts 1 and 2. The voiced over notes are not working. I will redo them tonight and repost. The PowerPoint for the notes are up right now.

B) Finish working on the first set of problems from the workbook we started yesterday. Tomorrow we will continue working on problems in class.

No other work.

If your grade is below an 80 you have to come in until it goes above an 80. If you did not turn work in then you have to come to class. If you were absent you also have to come to class to make up the day.
