

Assignment Wednesday November 5th Blended Physics

- A) Take quiz over Circular Motion. Due by 11:00 pm tonight. A certain student started to take the quiz during 2nd period today locking me out of trying to make 10 questions so you only have 7 questions. I tried to fix it but if anyone takes the quiz I can no longer put in more questions. I even deleted that person's attempt so that person needs to take the quiz again.
- B) The review for the test is posted.
- C) You have 2 worksheets due tomorrow.

No other work.

If your grade is below an 80 you have to come in until it goes above an 80. If you did not turn work in then you have to come to class. If you were absent you also have to come to class to make up the day.
